**Boot Code**:
the code specifies
which partition to boot.

A **partition table** stores the
- first sector,
- the length, and
- the type of a partition.

partition 1

partition 2

C
O
D
E

Boot
Sector

FAT

Super
block

inode
Table

It is a set of important, FS-specific data...

– **Solution**: The workaround is to save those
information on the device.
